

Risk #	The Risk of/That
1	Cybersecurity breach during IT system integration
2	Regulatory approval delay (OSFI / Minister of Finance)
3	Customer attrition from PC Financial portfolio post-migration
4	Data migration failure or corruption of customer records and transaction history
5	Key talent loss — PC Financial staff exit during transition uncertainty
6	Brand confusion / reputational damage during PC Financial rebrand to EQ Bank
7	Integration cost overrun beyond the \$105M budget
8	Loblaw co-dependency disruption — operational complexity of exiting Loblaw store infrastructure
9	Cross-sell conversion failure — EQB fails to upsell PC Financial customers into EQB products
10	Interest rate sensitivity affecting mortgage portfolio profitability post-acquisition
11	Regulatory capital requirement changes — OSFI imposes new capital buffers on combined entity
12	Third-party vendor / contract disputes — Loblaw-side service agreements not transferring cleanly
13	Credit quality deterioration — PC Financial loan book has higher default risk than disclosed
14	PIPEDA / privacy compliance failure due to expanded data migration scope
15	Competitor poaching of PC Financial customers by Big Six or fintechs during transition
16	Operational downtime during system cutover
17	Fraud spike during transition — account takeover and identity fraud exploiting integration confusion
18	Inaccurate due diligence — hidden non-performing loans surfacing post-close
19	HR integration friction — misaligned compensation, benefits, and culture between two firms
20	Liquidity risk from deposit runoff — unexpected withdrawal surge if customer confidence wavers
21	Loblaw relationship souring — residual commercial dependencies creating ongoing negotiation friction
22	Legal challenges from PC Financial employees — wrongful dismissal or class actions during integration
23	Adverse media coverage amplifying customer churn during any integration stumble
24	Mis-selling or product suitability complaints
25	Technology vendor lock-in — EQB inherits legacy PC Financial contracts expensive to exit
26	Failure to achieve \$30M annual cost synergy targets
27	AML compliance gaps — PC Financial's anti-money laundering controls not meeting EQB standards
28	Change management fatigue — internal teams overwhelmed by integration workstream volume

Risk #	The Risk of/That
29	ESG / reputational risk — environmental or social controversy attracting scrutiny during deal
30	Underestimating IT infrastructure age — legacy PC Financial systems more outdated than assessed
31	Loss of PC Optimum co-branding benefits due to loyalty program integration complexities
32	Geopolitical or macro shock — recession or housing market crash affecting EQB's mortgage-heavy book
33	Insurance and indemnity gaps — reps & warranties coverage insufficient for undisclosed liabilities
34	Governance integration lag — PC Financial board structures not dissolved cleanly
35	AI-driven personalization producing biased or discriminatory outcomes
36	TDH-EQB Fabric analytics platform fails to scale to 3.5M customers
37	EQB credit rating downgrade due to acquisition leverage
38	Cross-sell conversion opportunity — PC Financial credit-card-only customers convert to full EQ Bank relationships
39	Omnichannel expansion opportunity — Loblaw retail network opens new customer segments for EQB
40	AI personalization opportunity — PC Optimum spending data drives above-forecast revenue growth
